

# Dterm<sup>®</sup> Cordless II

## Greater Flexibility and Productivity

**T**he Dterm Cordless II handset is engineered to emulate your desk-set features and functionality. It provides all the functionality of your Key or PBX system to permit greater flexibility and improved productivity when you are away from your desk. Customer satisfaction increases, as calls no longer go unanswered. And the best part, you can increase productivity while becoming more efficient.

Feature for feature, the NEC Dterm Cordless II is hard to beat. For defense against unwanted interference and superior voice communication security, Digital Spread Spectrum Technology offers outstanding range and channel separation.

### Display and Handset Features

Numerous display and handset features provide a wealth of versatility for your cordless phone. The Dterm Cordless II

provides quick and easy-to-read information with a two-line, 16-digit dot-matrix display and four status icons. Four programmable keys (with four appearance lights) give you the same selected functionality as your electronic desk set including extension numbers. Single key access to Hold, Conference, Redial, Channel, Transfer, Mute and Talk keys allows the functionality of a desktop phone in the palm of your hand. The headset jack, now located at the top of the handset for easier access, allows for the connection of an optional headset for hands-free conversations.

The Dterm Cordless II includes Selectable Ring Tones and Vibrate Ringer, Ringer ON/OFF switch, Volume Control, Mute and Hot Swap Battery. Select from three ring tones and set each one high or low. Choose the silent alert (Vibration Mode) to receive calls without disturbing others, an ideal option for noisy environments. The Ringer ON/OFF switch allows you to turn off the ringer for unwanted calls, while the four-step Volume Control lets you select from four levels of volume in your earpiece (New HAC regulation compatible).

### Mobile and Versatile

The Dterm Cordless II can be used as a primary phone for users who desire mobility and convenience, or as an enhancement to a Dterm Multiline phone. Those who require the versatility and added feature set of softkeys provided by a Dterm Multiline phone can connect the Dterm Cordless II to their desktop set to use when mobility is required.

# Dterm Cordless II

## Greater Flexibility and Productivity

### Features

- 900MHz Digital Spread Spectrum
- 2-line, 16-digit Dot-matrix Display plus 4 Status Icons
- 4 Programmable Keys
- Headset Jack
- 3 Selectable Ring Tones and Vibrate Ringer
- Ringer ON/OFF Switch on the Handset
- 4 Step Volume Control
- Mute Control
- Hot Swap Battery
- Compact Handset
- Standby Battery Recharge System
- 10 Channels
- Belt Clip
- Page/Find
